Flattening A Pandemic's Curve: Why Staying Home Now Can Save Lives

March 13, 2020 · 7:21 PM ET

MARIA GODOY

- Both the brown and blue curves are exponential curves
- Unrestrained exponential growth is rapid (Brown)
- Restrained growth reduces the rate of increase (Blue)
 - Reduce human to human contact
 - Stay home if sick or vulnerable
 - Improve personal hygiene

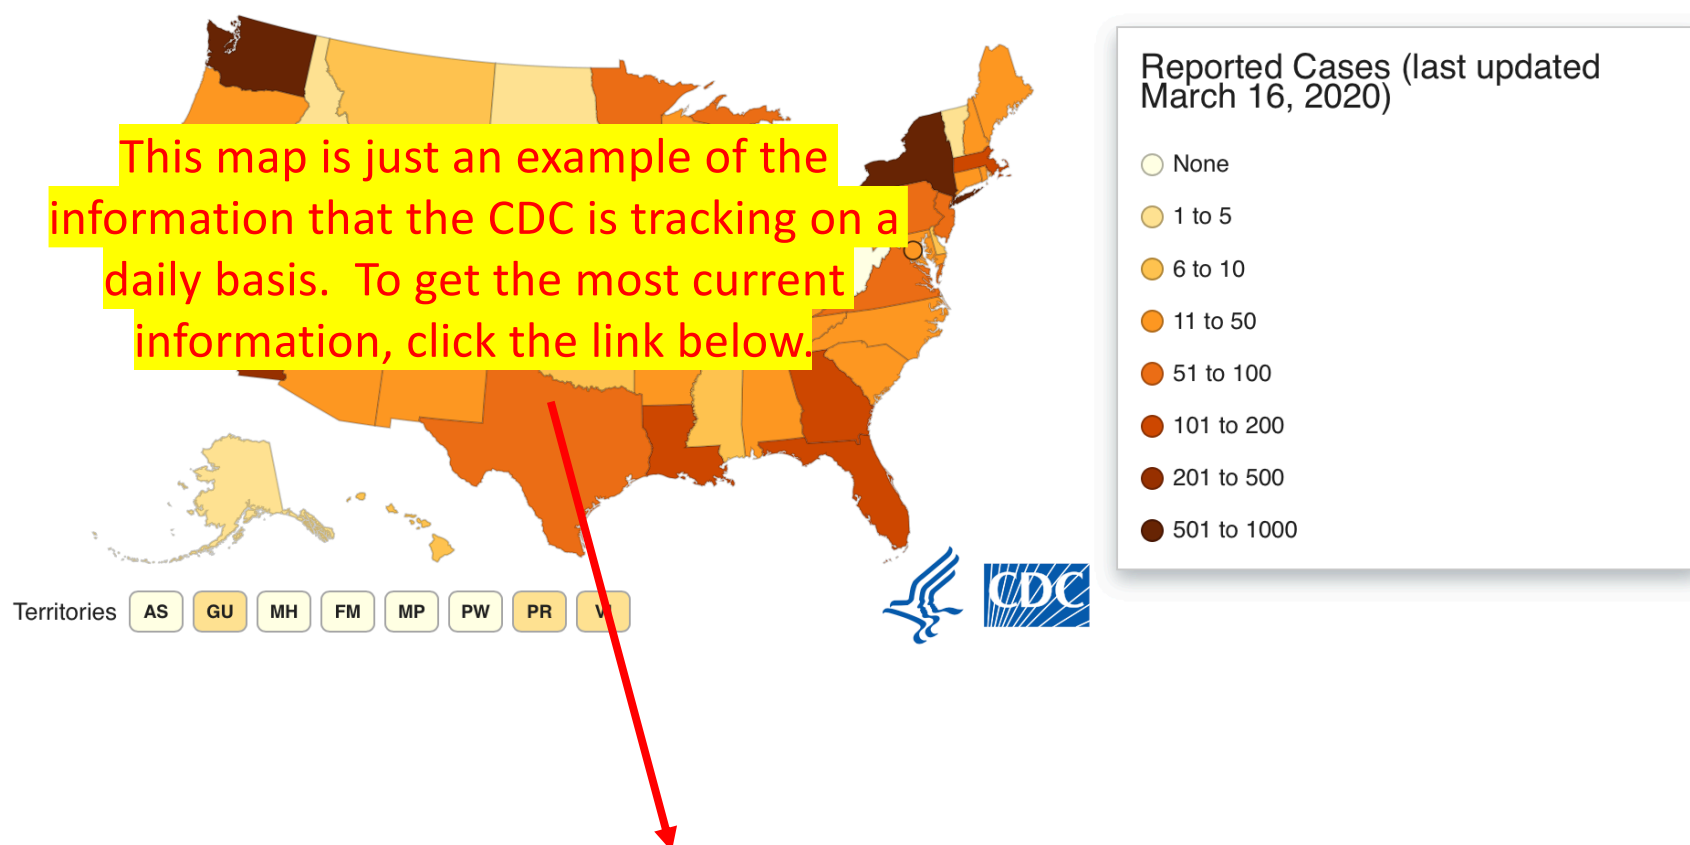

COVID-19 cases in the United States by date of illness onset, January 12, 2020, to March 15, 2020, at 4pm ET (n=920)**

ND Dept of Health Risk Levels

As of March 17, 2020 ND is at: **Low Risk – Threshold 1**

This information is updated regularly through the ND Governor's office and posted on the DMR website. To get the most current information, click the link below.

Following are definitions and recommendations for the three risk levels:

- Low Risk - Threshold 1 means unmitigated or uncontained community transmission of coronavirus is occurring elsewhere, but there may not be evidence of significant community transmission in North Dakota yet. At this level, authorities should consider initiating minimally restrictive, or burdensome, but effective mitigation measures. Additionally, authorities should consider canceling or postponing events where a substantive number of attendees are from high-risk locations or high-risk populations.
- Moderate risk - Threshold 2 is defined as unmitigated or uncontained community transmission of coronavirus occurring in at least one geographic jurisdiction within the state. At this level, authorities should consider canceling or rescheduling events if located within the area that has community transmission of the disease or if a large number of attendees are anticipated to come from these impacted areas. Consider alternative attendance options such as web-based, televised only or remote attendance.
- High Risk - Threshold 3 means there is widespread community transmission of coronavirus within North Dakota. At this level, authorities should cancel or postpone all events that involve the potential for disease transmission and cannot accommodate alternative attendance options.

ND Department of Mineral Resources COVID-19 Response:

DMR is following the [guidelines as provided by the North Dakota Governor](#) in conjunction with the North Dakota Department of Health which have North Dakota at a “Low Risk – Threshold 1”. Should North Dakota be moved to “Moderate Risk – Threshold 2” alternatives to the below will be considered and will be communicated at www.dmr.nd.gov/oilgas.

- Oil and Gas Hearings are currently proceeding as scheduled. You can still [listen to all hearings live online](#).
- Guidance on North Dakota Industrial Commission meetings can be found at www.nd.gov/ndic
- If you are North Dakota operator that needs assistance with reporting please seek guidance from the [Forms](#) section of the Oil and Gas website or contact our office at oilandgasinfo@nd.gov

The latest news from North Dakota on COVID-19 Prevention
